

Ultraclean Disinfect+ Efficacy Test Summary

All tests carried out at 5% v/v

Claim	Test Carried Out	Conducted By	Concentration	Test Duration	Organisms Used	Conditions
• Bactericidal	BS EN 13727	Abbott Analytical	5% v/v	1 minute	Pseudomonas aeruginosa, Staphylococcus aureus, Enterococcus hirae	Dirty conditions at 20°C
• Mycobactericidal/Tuberculocidal	BS EN 14348	Abbott Analytical	5% v/v	15 minutes	Mycobacterium terrae, Mycobacterium avium	Dirty conditions at 20°C
• Fungicidal/Yeasticidal	BS EN 13624	Abbott Analytical	5% v/v	1 minute	Aspergillus niger, Candida albicans	Dirty conditions at 20°C
• Effective against Enveloped viruses (including Coronaviruses)	DVV/RKI Virucidal Test	MikroLab GmbH	5% v/v	1 minute	Vaccinia virus, Bovine Viral Diarrhea virus (surrogate of HCV)	20°C test temperature
After evaluation with Vaccinia virus and Bovine Viral Diarrhea (BVDV, surrogate of Hepatitis C virus), the formulation can be detected as having "limited virucidal" properties according to a recommendation of an expert committee of RKI (Bundesgesundheitsbl 2004, 47: 62-66) and is thus able to inactivate all enveloped viruses.
